LINE CLEANING SERVICES

Full Reset Cleaning

New Clean Lines clients, and systems that haven't been cleaned within the last 30 days, requires a **FULL RESET CLEANING**. We take extra care in giving your system a top-to-bottom inspection, looking for signs of wear and tear in every component.

Full System Inspection
Soak / Clean Couplers
Soak / Clean Faucets

20 min. Recirculation
6% Caustic Solution

14-Day Cleaning

Our Micromatic certified draft techs use a state of the art recirculation method, proven to be the **ONLY** way to get your system as clean as possible. The goal is to make sure we clean the system while the system is clean. With a **14-Day Cleaning** plan, you get the best possible service at the lowest price.

Soak / Clean Faucets
15 min. Recirculation
3% Caustic Solution

90-Day Cleaning

Once every 90 days, we'll need to inspect the entire system for wear & tear, bad seals, air leaks, or any number of potential contaminants. We also use an acid based cleaning solution to help with the buildup of beer stone (calcium oxalate) – which can not only affect the flavor of your beer, but also cause excess foaming. We're keeping you from pouring your profit down the drain!

Full System Inspection
Soak / Clean Couplers
Soak / Clean Faucets

20 min. Recirculation
6% Acidic Solution
